

Funded Projects & Consultancy

The institution encourages faculty members to participate in academic research activities, consultancy services, collaborative programmes, and professional development initiatives that contribute to academic enrichment and community development. Faculty members are motivated to engage in research-oriented practices and interdisciplinary academic collaborations.

Activities

- Participation in academic research activities
- Consultancy and advisory support
- Collaborative academic programmes
- Faculty participation in seminars and workshops
- Preparation and submission of research proposals
- Community-oriented academic initiatives

Objectives

- Promote research awareness among faculty
- Encourage collaborative academic activities
- Strengthen professional and institutional networking
- Support applied and socially relevant academic practices
- Enhance academic quality and professional development
