B.Sc Honours – Microbiology

Exploring the Invisible World of Life Sciences

The B.Sc Honours – Microbiology programme at St. Ann's College for Women provides students with strong foundations in microbiology, biotechnology, immunology, genetics, molecular biology, and laboratory techniques. The programme is designed to develop scientific knowledge, analytical thinking, research skills, and practical expertise required in modern biological and healthcare sciences.

The combination of Microbiology with Botany Minor offers students interdisciplinary knowledge in plant sciences, biodiversity, plant physiology, medicinal plants, environmental biology, and sustainable ecosystems, enhancing opportunities in research, agriculture, biotechnology, and environmental sciences.

Presently offered as a Three-Year Degree Programme.

Programme Highlights

- Advanced learning in microbiology and life sciences
- Practical laboratory training and research exposure
- Skill development in microbiological techniques and diagnostics
- Study of microorganisms, plant sciences, and environmental systems
- Industry-oriented curriculum with scientific applications
- Focus on innovation, scientific research, and higher education readiness
- Experienced faculty with academic and practical expertise
- Opportunities for seminars, workshops, projects, and internships

Major Subjects in Microbiology

- General Microbiology
- Cell Biology
- Microbial Physiology
- Genetics & Molecular Biology
- Immunology

- Medical Microbiology
- Industrial Microbiology
- Environmental Microbiology
- Biotechnology
- Bioinformatics

Minor Course – Botany

The **Botany Minor** strengthens understanding of:

- Plant Diversity & Taxonomy
- Plant Physiology
- Ecology & Environmental Science
- Medicinal & Economic Plants
- Plant Biotechnology
- Sustainable Agriculture & Biodiversity Conservation

Career Opportunities

Graduates can pursue careers as:

- Microbiologist
- Research Assistant
- Laboratory Technician
- Quality Control Analyst
- Biotechnology Associate
- Clinical Laboratory Professional
- Environmental Analyst
- Food & Pharmaceutical Industry Executive
- Academic & Research Scholar

Students may also pursue higher education such as M.Sc Microbiology, Biotechnology, Botany, Molecular Biology, Bioinformatics, Environmental Science, and related life science programmes.

Why Choose St. Ann's College for Women?

- Well-equipped science laboratories

- Student-centered academic environment
- Research-oriented learning approach
- Emphasis on practical exposure and skill enhancement
- Academic excellence with holistic development
- Encouragement for innovation and scientific exploration
- Strong support for higher education and career growth

Eligibility Criteria

Students seeking admission into **B.Sc Honours – Microbiology** should fulfil the following eligibility requirements:

- Must have completed Intermediate / Class XII with **BiPC / MBiPC** or equivalent stream

Must have passed from a recognized Board of Education
