B.Sc Honours – Statistics

Data • Analytics • Decision Making

The B.Sc Honours – Statistics programme at St. Ann's College for Women is a dynamic undergraduate programme designed to develop strong analytical, mathematical, computational, and problem-solving abilities required in today's data-driven world. The programme provides in-depth knowledge in Probability, Statistical Methods, Data Analytics, Survey Sampling, Operations Research, Numerical Analysis, and Computational Statistics through both theoretical and practical learning approaches.

Presently offered as a Three-Year Degree Programme.

The integration of Statistics with Computer Science Minor enables students to acquire valuable skills in programming, database management, statistical computing, and data interpretation, preparing them for careers in analytics, finance, banking, insurance, research, healthcare, and information technology sectors.

Why Choose St. Ann's College for Women?

At **St. Ann's College for Women**, students receive holistic education that combines academic excellence, practical exposure, discipline, and value-based learning.

Our Strengths

- Experienced and supportive faculty
- Well-equipped computer and statistics laboratories
- Industry-oriented curriculum with practical training
- Focus on skill development and employability
- Individual mentoring and academic guidance
- Workshops, seminars, internships, and project opportunities
- Safe and student-friendly campus environment
- Encouragement for higher studies, research, and innovation
- Placement support and career guidance
- Value-based education with emphasis on leadership and ethics

Programme Highlights

- Strong foundation in Statistics, Mathematics, and Data Analysis
- Practical exposure through statistical laboratories and software tools
- Training in MS Excel, R Programming, Python, and Database Management
- Industry-oriented curriculum with research and project work
- Development of analytical thinking and logical reasoning skills
- Hands-on learning through assignments, case studies, and mini projects
- Skill enhancement in actuarial science and operations research
- Preparation for careers in analytics, finance, insurance, banking, and IT industries

Why Study B.Sc Honours – Statistics?

Statistics plays a vital role in modern industries where data-driven decision-making is essential. This programme helps students understand how to collect, organize, interpret, and analyze data to solve real-world problems.

Students gain skills in:

- Data analysis and interpretation
- Statistical modelling and forecasting
- Research and quantitative techniques
- Computational and programming skills
- Decision-making using statistical tools
- Problem-solving and logical reasoning

The increasing demand for professionals in Data Science, Artificial Intelligence, Banking Analytics, Insurance Analytics, Financial Modelling, and Research has created excellent career opportunities for Statistics graduates worldwide.

Core Subjects

Statistics Courses

- Descriptive Statistics
- Theory of Probability and Mathematical Expectations
- Theoretical Discrete Distributions

- Theoretical Continuous Distributions
- Statistical Methods
- Inferential Statistics
- Sampling Techniques
- Design and Analysis of Experiments
- Applied Statistics
- Operations Research
- Statistical Data Analysis using MS Excel
- Computational Statistics and R Programming
- Project Work & Research Methodology

Practical Courses

- Descriptive Statistics Practical
- Probability Practical
- Distribution Theory Practical
- Statistical Methods Practical
- Inferential Statistics Practical
- Sampling Techniques Practical
- Experimental Design Practical
- Applied Statistics Practical
- Operations Research Practical
- R Programming Practical
- Statistical Analysis using MS Excel Practical

Proposed Minor Course -Computer Science

- Computer Fundamentals and Office Automation
- Problem Solving Using C
- Database Management System
- OOPS through Java
- Python Programming

- Web Interface Design Technologies

All courses are supported with practical laboratory sessions to ensure hands-on learning and industry readiness.

Career Opportunities

Graduates of B.Sc Honours – Statistics can pursue careers in:

- Data Analytics
- Banking and Financial Services
- Insurance and Actuarial Science
- Business Analytics
- Risk Management
- Research and Development
- Statistical Consulting
- IT and Software Industries
- Government Organizations

Job Profiles

- Statistician
- Data Analyst
- Financial Analyst
- Risk Analyst
- Actuarial Analyst
- Operations Research Analyst
- Market Research Analyst
- Statistical Programmer
- Credit Control Executive

Top Recruiters

- Cognizant
- IBM
- Infosys

- Wipro
- Deloitte
- HDFC Bank
- Google
- UBS
- Federal Bank

Graduates can expect rewarding career opportunities with excellent salary packages and long-term professional growth.

Higher Education & Research Opportunities

Students can pursue higher studies such as:

- M.Sc Statistics
- M.Sc Data Science
- M.Sc Actuarial Science
- MBA Analytics
- MCA
- Research Programmes

Students may also pursue research opportunities and competitive examinations in premier institutions such as **ISI, IITs, and TIFR**.

Eligibility

Students seeking admission into B.Sc Honours – Statistics should fulfil the following criteria:

- Pass in Intermediate / Class 12 or equivalent examination
- Mathematics as one of the subjects
- Eligible groups: **MPC, MEC, and MBiPC**
- Must have studied from a recognized board

Future Scope

The demand for qualified Statistics professionals is rapidly increasing across sectors including:

- Banking & Finance
- Insurance

- Healthcare Analytics
- Artificial Intelligence
- Data Science
- Research Organizations
- Government Agencies
- IT & Software Services

With the expansion of digital technologies and analytics-based industries, Statistics graduates are highly valued for their analytical, computational, and decision-making abilities.

The programme prepares students not only for successful careers but also for entrepreneurship, higher education, research, and emerging opportunities in data-driven industries.
