

Industry Expert Lectures

St. Ann's College for Women regularly organizes guest lectures, expert talks, webinars, and interactive sessions by industry professionals, entrepreneurs, academicians, and corporate experts to provide students with practical exposure and professional awareness.

These programmes help students understand current industry practices, emerging trends, career opportunities, and the skills required to succeed in the professional world.

Objectives

- Expose students to current industry trends and developments
- Provide career guidance and professional insights
- Bridge the gap between academic learning and industry expectations
- Enhance subject knowledge and employability skills
- Encourage innovation, leadership, and entrepreneurship

Key Features

- Interactive sessions with industry experts
- Career guidance and awareness programmes
- Sector-specific knowledge sharing
- Discussions on emerging technologies and innovations
- Entrepreneurship and startup guidance
- Skill development and professional motivation programmes

The institution continuously promotes industry-academia interaction through expert lectures and professional engagement activities to enrich the learning experience and prepare students for future career opportunities.
