

Professional Certification Programmes

St. Ann's College for Women offers professional certification programmes and value-added courses in collaboration with industry experts, training organizations, and academic partners to enhance students' professional competencies and career readiness.

These programmes are designed to provide practical knowledge, industry exposure, and skill-based learning beyond the regular curriculum, enabling students to meet emerging professional and industry requirements.

Objectives

- Enhance industry readiness and employability
- Develop technical, professional, and life skills
- Provide exposure to emerging technologies and trends
- Encourage entrepreneurship and innovation
- Promote continuous learning and self-development

Programme Areas

- Communication and soft skills
- Computer applications and digital skills
- Financial literacy and accounting tools
- Entrepreneurship and business development
- Data analytics and emerging technologies
- Career-oriented and skill-based certification courses

The institution regularly organizes certification programmes, workshops, and training sessions to help students acquire additional qualifications, improve confidence, and strengthen career opportunities in diverse professional fields.
